

NATIONAL REBAR FABRICATION, INC.

To Parker Tech Group

We just wanted to write you a note on how pleased we are at National Rebar Fabrications with the 8 camera surveillance system we purchased from you. It has proven to be very user friendly to the all that have security assist to the system. The ease of the web view of the camera system has proven it will pay for itself in increase productivity. The playback, the snapshot and video has already been used in providing the police with the evidence needed to catch the weekend vandals.

When compared with the price of other systems our company priced, the system PTG offers is a great value!

Thank again for offering such a great product.
